PACT TO RETURN TO ORIGIN · XI CONGRESS · ONIC 2026

MACI · Framework for Action with Indigenous Communities

The bankable vehicle that channels the mandates of ONIC's XI Congress into international financing for 2026-2030

USD 60-80M · 5 YEARS | ~18M HA · 5 STRATEGIC ECOSYSTEMS | 8 INSTITUTIONAL COUNTERPARTS

RRI BRASÍLIA SUMMIT · MAY 26-29

The proposal · 5 modules · USD 12.79M year 1

MACI is not a project — it is the operational architecture that ONIC proposes to channel international funding to Colombia's 5 Indigenous macro-regions during 2026-2030. Each module is a stand-alone project profile with auditable budget and mapped institutional donors.

1	**Governance and Sovereignty (CREA)** Biocultural protocols · FPIC · ABS · Data Council	**USD 288K** year 1
2	**Sovereign Data Platform (PSB)** Architecture · MVP · catalog · APIs · CARE+FAIR	**USD 531K** year 1
3	**Community Biocultural Monitoring** Inventories · QA/QC · results returned to communities	**USD 7.09M** year 1
4	**Genetics and Biobank** In-situ sequencing · Indigenous-led custody chain	**USD 1.27M** year 1
5	**Bioeconomy and Sustainability** Business incubation · blended finance · Nagoya ABS	**USD 2.46M** year 1

The evidence · 5 ONIC macro-regions with verifiable cases

ONIC represents 102 Indigenous peoples across **all of Colombia**. Each region has an operational case or a consolidated jurisprudence baseline that MACI proposes to scale and articulate:

AMAZON	ORINOCO	ANDES	CARIBBEAN-SIERRA	PACIFIC
Matavén · Verra ID 1566 · VCS+CCB · 1.85M ha · 6 ethnic groups	Cumaribo + Useful Plants Catalogue · 5,690 species (Kew + GBIF)	U'wa · Sierra Nevada del Cocuy · Ruling SU-039/1997 foundational FPIC	4 peoples · Línea Negra · Kogui/Wiwa/Arhuaco/I	Chocó · Embera Dóbida and Katío · artisanal fishing · noni

Data 77% verifiable · 23% assumed (asterisked) · honesty before the Council and donors > appearance of completeness · official basis: MACI Baseline 2022 + Roadmap 2023 + Phase 1 Formulation 2025.

The ask in Brasília · five concrete 2026-2030 windows

Less than 1% of the USD 1.7 billion pledged in Glasgow's Forest Tenure Pledge has reached Indigenous national organizations directly. This is structural — and MACI offers the institutional vehicle to correct it. Five concrete windows actionable at the Summit:

Ford Foundation Andean · Module 1 biocultural protocols — **USD 150-300K**
Multi-year window to scale FPIC/ABS harmonized across the 5 macro-regions · base U'wa SU-039.

NICFI Civil Society Call III · Module 3 Indigenous-led MRV — **USD 1-5M**
Custody chain already certified (Matavén Verra+CCB) · scaling to Sierra Nevada Línea Negra.

IDB-Lab Innovation Grant · Modules 3+5 scaling — **USD 500K-2M**
Matavén model + Useful Plants Catalogue 5,690 species to 10 ONIC territories.

GIZ LATAM Bioeconomy 2026-29 · Module 5 — **USD 500K-2M**
Scaling Book Economías Propias SMT + Useful Plants georeferenced catalogue.

FCLP Country Package Colombia · Module 3 territorial — **USD 2-10M**
TEF overlaps Matavén + Línea Negra + U'wa Cocuy · Forest Tenure Pledge succession.

Continuity of political mandate

MACI operationally implements the **Declaration of Wise Men and Women COP16** (Java Liviana · Muysca People · Oct-2024) and the **TRÜA Global Summit recommendations to the OS8j** of the Convention on Biological Diversity. *"Return to origin · change ambitious, violent, selfish and irresponsible ways of existing"* (Wise Ones COP16). Brasília 2026 is the next operational station of this mandate.

Direct support to ongoing initiatives: contributions from USD 100 via SMT-ONIC portal · **smt-onic.com/donation/projects/?category=44**

What we ask in the room

> *"Direct fiduciary recognition of ONIC without intermediary vehicles that dilute political control. Less than 1% of post-COP26 USD 1.7B reaches Indigenous national organizations directly. MACI offers the architecture that funders can actually transfer to."*
